Analysis of a Personal Energetic Homeostasis by Measuring Energy Field

clocloede 2017-12-28

Bio-Well
Human Energy Field - is the most sensitive reflection of the physical, emotional and, in some cases, spiritual condition of a person. The image of Energy Field, created in Bio-Well software is based on ideas of Traditional Chinese Medicine and verified by 18 years of clinical experience by hundreds of medical doctors with many thousands of patients.

Bio-Well is not a medical instrument, it is not designed for medical diagnostic, it allows conducting energy analysis. In case of health concerns, please, consult your doctor.
The Health Status is designed for analysis the functional state of the human body, by calculating the integral parameters of energy distribution in the body and in organs and for their comparison with reference parameters of a practically healthy person calculated in according with the database.

The typical energy level corresponds to the green zone in the middle. The inner circle is the area of energy deficiency (hypo-energy state). The outer ring is the area of energy excess (hyper-energy state). The diagrams are divided into the sectors related to a certain part of the human body.

Bio-Well is not a medical instrument, it is not designed for medical diagnostic, it allows conducting energy analysis. In case of health concerns, please, consult your doctor.
The Energy Reserve is designed for analysis of the functional state of the human body, by calculating the Energy parameter of the particular organ. Represents energy reserve of different cells of the body. Comparison with the Health Status demonstrates the level of energy kept in the cells comparing with energy being used at the moment. It is beneficial when the Energy Reserve outline is wider/larger than the Health Status outline (applicable only with the appropriate calibration).

**Energy**

Demonstrate the level of energy for the particular person both in Joules and in %% related to the Database of apparently healthy people, measured from 0 to 100 Joules (×10^-2).

- **0 - 20 Joules (×10^-2)** - low energy (may be related to energy deficiency, as well as to meditative state)
- **20 - 40 Joules (×10^-2)** - decreased energy
- **40 - 70 Joules (×10^-2)** - typical energy
- **70 - 90 Joules (×10^-2)** - heightened energy - characteristic of people with high level of energy
- **90 - 100 Joules (×10^-2)** - high energy - typical for athletes, top managers, at the same time may be an indication of inflammation.
Balance

- **0 - 50%** - very low balance - indication of serious mis-functioning
- **50% - 90%** - low balance - indication of functional disorder
- **90% - 100%** - typical balance

Emotional Pressure

- **0 - 2** - very calm, relaxed people that may be due to several factors: deep meditation, complete inner peace; the effects of psychedelics; deep sleep in the peaceful phase; at the same time it may be the case of chronic depression or in some cases inflammation, severe disease; we'll discuss this in the next part of the book.
- **2 - 3** - normal calm quiescent state.
- **3 - 4** - the state of anxiety. The state of permanent anxiety without relaxations may be the reason for serious problems.
- **4 - 6** - the excited stress state characteristic of active work, excitement, intense activity. This state is typical in high-level managers, militaries and people with responsible jobs. It may be related as well to the high anxiety level.
- **6 - 8** - at least four possible situations:
  - The reaction to a previous stressful situation (an unpleasant conversation, illness, failure in the training process, driving in stressful conditions, etc.). In this case, it is necessary to calm the patient and repeat the measurement after half an hour.
  - Increased nervousness, accumulated over long periods of time stress, emotional stress, autonomic dysfunction.
  - People with a special type of mentality that can quickly switch from a state of extreme excitement, nervousness, in the quiescent state.
  - The state of overtraining, fatigue, risk of injury.
  - Athletes in the moment of competition, actors at the performance, students at exams, etc.
  - Children in a state of nervous excitement.
- **8 - 10** - a very high level of stress, the peak of emotional excitement. If a patient with activation level 8-10 appears calm, this could indicate a dangerous situation: the person is on the verge of a nervous breakdown, so be aware and exercise caution.

Energy balance

Bio-Well is not a medical instrument, it is not designed for medical diagnostic, it allows conducting energy analysis. In case of health concerns, please, consult your doctor.
According to Eastern metaphysical theories and principles of Ayurvedic Indian medicine, there are seven "Chakras" or integrated energy centers that are considered to affect physical, mental, emotional, and spiritual well-being. In the Bio-Well programs, Chakras reflect emotional state of a person. Chakras are related to energy flow internally and externally. They are not stable and may change every other minute. Stability of Chakras is indication of emotional balance of a person. Ideal balance of Chakras may be seen for people involved in daily meditation and mental training.

Shift Chakras to the right (when we look to the picture) is related to the inner emotional reactions of a person.

Shift Chakras to the left (when we look to the picture) is related to the response to environmental situation (other people, electromagnetic fields, weather, etc).

Parameters of Chakras:

Alignment - characteristics of the shift from the center averaged on all chakras; changes from 0 to 100%.

Index - characteristics of the shift from the center together with the size averaged on all chakras; changes from 0 to 100%.

Energy averaged on all Chakras; changes from 0 to 10 Joules ($\times 10^{-2}$); optimal 5-7 Joules ($\times 10^{-2}$).

Biorhythms curves represent variation of the main cycles of a human energy during a month: physical, emotional and intellectual. They are calculated from the day of birth, so if there are no information of the date of birth in the person’s card, biorhythms are not calculated. When particular biorhythm is in the upper part of the cycle, these are beneficial days for the activity. When one or two biorhythms are down, these are non-beneficial days, i.e. energy for the specific activity at these days will be low and we need to keep this in mind. It is even worse when two or all three biorhythms are down. For example, when physical cycle is in the lower part, your concentration may be diminished and you have to be careful when driving. In Oriental countries people never make important decisions with low biorhythms.

Bio-Well is not a medical instrument, it is not designed for medical diagnostic, it allows conducting energy analysis. In case of health concerns, please, consult your doctor.
Bio-Well has been developed by an international team led by Dr. Konstantin Korotkov and brings the powerful technology known as Gas Discharge Visualization technique to market in a more accessible way than ever before. The product consists of a desktop camera and accompanying software, which allows a user to quickly and easily conduct human energy scans. GDV Technique is the computer registration and analysis of electrophotonic emissions of different objects, including biological (specifically the human fingers) resulting from placing the object in the high-intensity electromagnetic field on the device lens.

When a scan is conducted, a weak electrical current is applied to the fingertips for less than a millisecond. The object's response to this stimulus is the formation of a variation of an "electron cloud" composed of light energy photons. The electronic "glow" of this discharge, which is invisible to the human eye, is captured by the camera system and then translated and transmitted back in graphical representations to show energy, stress and vitality evaluations. The images are then mapped to different organs and systems of the body, tapping into Chinese energy meridians.

The image, which we create in Bio-Well instrument, is based on ideas of Traditional Chinese Medicine and verified by 18 years of clinical experience by hundreds of medical doctors with many thousands of patients.
